## Ultra-Rugged Mobile Computer

Honeywell offers a true no-compromise solution with the CK71 Ultra-Rugged Mobile Computer. In addition to being 31% smaller and lighter than other form factors in its class, the CK71 mobile computer is optimized for your warehouse and distribution environments with premium, industrial-grade materials for the perfect balance of ruggedness and duty cycle along with features that focus on enabling flexibility and agility, even in the most extreme conditions. Extend the use of the CK71 mobile computer into hazardous locations with the non-incendive certified (Div. 2) CK71.

When workload demands shift unexpectedly, the CK71 mobile computer gives workers the flexibility to quickly transition to tasks that require near or far scanning, speech, voice and image capture, without wasting time finding and re-orienting themselves on unfamiliar devices. Because CK71 supports Honeywell wired or wireless headsets and voice software, customers have the option of traditional or voice-enabled workflows with this product. With a dual-band 802.11n WLAN radio, the CK71 mobile computer delivers rock-solid performance and consistently fast response times, even in areas where you might experience low signal levels or intermittent connections.

The unique device health reporting capability of the CK71 mobile computer provides insight never before available to allow workers and IT administrators to monitor and prevent issues before they impact operations. Key subsystems including battery life, scanning and communications can be monitored by either the mobile worker via an on-board dashboard or remotely through the Honeywell SmartSystems™ Foundation management console, resulting in optimization and better utilization of your mobile computing assets.

*Smaller and lighter than others in its ultra-rugged class, the CK71 mobile computer is optimized for warehouse and distribution environments with premium, industrialgrade materials and next-generation features for maximum business agility.*

The CK71 mobile computer is just one model out of four ergonomic designs that are available in the 70 Series family. Each model includes choices of radios, keypads, imagers, software and services, giving you the option of tailoring a specific solution to meet the various application areas within your environment and the preferences and needs of your employees. With a single platform approach, the 70 Series family reduces infrastructure complexity and cost. The single computer architecture, software build, set of peripherals and charging system that is shared between the 70 Series products brings simplicity to the frequent tasks of software updates, training new employees, managing spares pools and charging devices.
